DETAILED ACTION

Amendment

1. Receipt is acknowledged of the Amendment filed October 15, 2003.
2. The following is an examiner's statement of reasons for allowance:

Allowable Subject Matter

3. Claims 1-20 are allowable over prior art.

The following is an examiner's for allowance: Additional references have been added to the record, which the examiner believes are relevant to the present invention. Particularly, the patent disclosed by Kishida et al teaches an image sensor pressing a document against a feed roller as well as a printer pressing a document against a feed roller. Although Kishida et al teaches both of these limitations, the above identified prior art of record, taken alone, or in combination with any other prior art, fails to teach or fairly suggest the main and most important feature of the present claimed invention. The drawings and the present claims teach both the image sensor and the printer pressing the document against the same feed roller (a single feed roller) as opposed to the image sensor and the printer pressing the document against separate feed rollers. Moreover, one of ordinary skill in the art would not have been motivated to come to the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Motoyama (6,473,812), Imamura et al (5,495,277), and Oi (4,635,130).
